Projector booking

All projectors are booked through the store room in Block C. To make a booking, visit the store room counter with your staff identity card and fill in the equipment loan register with the date, time, venue, and your contact number. The storekeeper will confirm availability and reserve the unit for you. A booking needs 24 hours notice, so please plan ahead and do not arrive expecting same-day issue. During the examination season demand is high, and booking two days early is strongly recommended. When you collect the projector, check that the power cable, VGA cable, HDMI cable, and remote control are all in the carry case before you sign for them. Report any missing item immediately so you are not held responsible later.

Loan period and return

The maximum loan is 3 days for any single booking. If your event runs longer, you must return the projector on the third day and make a fresh booking, subject to availability. Extensions are granted only if no other booking is waiting. Return the projector to the store room counter, not to any other office. The storekeeper will test the unit in front of you and sign the register to close the loan. Late returns attract a reminder on the first day and a report to the head of department after that. If a lamp fails during your loan, switch the projector off immediately, do not open the casing, and bring the unit back to the store room the same day so a replacement lamp can be fitted.

Care and troubleshooting

Keep the projector vents clear and never place books or cloth on top of the unit while it is running. After switching off, wait for the cooling fan to stop before unplugging the power cable. If there is no image, check that the correct input source is selected on the remote, then check the cable connections at both ends. If the image is dim, the lamp may be near the end of its life, and you should report it to the store room. For sound problems, check the laptop volume first, then the projector volume. For any fault you cannot fix in five minutes, call the IT Cell help desk on extension 4455 and keep the projector switched off until help arrives.
